GROWTH ANALYTICS & ALGORITHM BENCHMARKS

The 2026 Social Media Playbook

Organic social reach has changed fundamentally in 2026. Chasing follower counts is dead. Here is what algorithmic recommendation engines actually reward across every major channel.

GROWTH ANALYTICS & ALGORITHM BENCHMARKS

1. LinkedIn: Dwell Time & Documents

LinkedIn's algorithm heavily rewards time spent on post. Multi-slide PDF carousels hold dwell time 3.4x longer than standard text posts, driving exponential 2nd-degree feed reach.

GROWTH ANALYTICS & ALGORITHM BENCHMARKS

2. YouTube Shorts: Hook & Re-watches

YouTube Shorts prioritizes the 3-second hold rate. If your short video holds >70% at 3 seconds and achieves >100% average view percentage, distribution multiplies by 10x.

GROWTH ANALYTICS & ALGORITHM BENCHMARKS

3. Instagram: Sends & Saves over Likes

Instagram's ranker weighs 'Send to friend via DM' and 'Bookmark Save' 5x higher than passive double-tap likes. If content isn't actionable enough to save, reach stalls.
