5 Video Editing Mistakes Costing You Hours

Video editing shouldn't take 10 hours for a 5-minute video. If you are still editing like it's 2015, you are losing hours of creative energy. Here are the 5 mistakes to avoid.

AI VIDEO & VOICE ENGINEERING

Mistake 1: Timeline Scrubbing

Manually scanning timelines to find and delete pauses is a massive waste of time. Modern prompt editors trim silence automatically with a single directive.

AI VIDEO & VOICE ENGINEERING

Mistake 2: Re-recording Whole Takes

Never set up lights and microphone again
just because you stumbled on one word.
IncuBrix Voice Hub lets you edit the text
and resynthesizes your cloned voice
seamlessly.

Mistake 3: Manual Subtitle Timing

Burning in captions word-by-word manually is dead. Automated dynamic captioning aligns subtitles with spoken audio at 30 fps automatically.
